

Narcotic Gas Attack Alarm

EtherAlert™

Plug-in Unit

- ✓ **Small**
- ✓ **Tough**
- ✓ **Portable**
- ✓ **Low Power**
- ✓ **Loud Alarm**
- ✓ **Cigarette Socket Powered (12V)**

The Need for EtherAlert™

Reports of narcotic or “sleeping” gases being used in robberies are on the increase. This is a real threat to those who enjoy spending the night in their motorhome or caravan. When released into a confined space, these sprays leave occupants heavily sedated enabling robberies to take place without their knowledge.

Effective

The EA1200 has been designed as an effective deterrent for such attacks. It is small, neat and robust. The cable is simply plugged into the 12V vehicle cigarette socket and then the unit placed close to the sleeping area. The integral sensor detects ether-based gases at very low levels before they can take effect. When gas is detected a loud buzzer sounds to deter intruders and wake the occupants.

Simple to Use

The unit is powered as soon as it is plugged in. After a short warm-up period it is ready for use. Lamps indicate system power, alarm and fault conditions. A push button is used to test the unit. The EA1200 is factory calibrated and requires no replaceable parts or user adjustment.

Portable

The EA1200 is ideal for those wanting quick and easy protection.

Low Power

The latest technology sensors combine high performance with very low power consumption.

Specification	Model EA1200
Detection:	Ether- based gases LPG (butane & propane)
Operating voltage:	12 Vdc (10 to 16 Vdc)
Current consumption:	60 mA (normal operation) 100 mA (alarm)
Temperature range:	-20 C to +40 C
Siren volume:	85dB
Dimensions:	65x65x25(depth) mm
Cable length:	4m
Plug:	Vehicle cigarette socket

Specification subject to change without notice
